TAVERN CROWD

# Top 100 Female Duergar Names

*Duergar names derive from a guttural, Germanic linguistic root, influenced by the harsh environment of the Underdark. Expect sounds like "gr," "dr," and "zr," with a preference for consonant clusters and minimal bright vowels, creating names that feel bitter and hardened. Cultural naming conventions often include clan names, such as "Ironshadow," and patronymics, where a name reflects lineage, like "Thorin son of Grax." When creating your own name, consider using a harsh-sounding combination of consonants followed by a single, dark vowel to capture that oppressive essence.*
