TAVERN CROWD

Top 100 Male Goblin Names

When creating goblin names, draw inspiration from languages with harsh, guttural sounds, such as German or certain Slavic languages. Focus on short, punchy names with 1-2 syllables, featuring hard consonants like k, g, and z, often ending in nasal sounds like 'n' or 'm'. Goblin names often reflect chaotic incidents or objects, so consider using nicknames that describe a defining trait or event, like "Squeak" or "Crack." For a unique touch, combine a sound or object with a descriptor, like "Zig Stomp" or "Grim Snarl," to capture the goblin's essence and history.
