TAVERN CROWD

Top 100 Male Halfling Names

When creating Halfling names, draw inspiration from English countryside names, focusing on warm, round sounds with soft consonants like b, m, p, and w. First names often consist of two or three syllables, featuring cozy, diminutive endings—think "Tilly" or "Milo." Surnames typically reference food, nature, or geography, using endings like -bottom, -brook, -hill, or -berry. For a personalized touch, consider blending a first name that evokes a gentle image with a surname that nods to a favorite local feature or dish.
