TAVERN CROWD

Top 100 Male Hobgoblin Names

Hobgoblin names draw from harsh goblinoid roots mixed with influences from Latin or ancient military terms, reflecting their structured culture. Look for two or three syllables, often starting with a hard consonant followed by a vowel (like "Grak" or "Vul"). Clan names are common, often preceding individual names, and ranks or titles like "Centurion" or "Lieutenant" are frequently attached. When creating your own name, consider combining a strong consonant sound with a meaningful suffix, like "-ak" or "-or," to convey a sense of authority and order.
