TAVERN CROWD

Top 100 Female Kenku Names

When creating Kenku names, draw inspiration from onomatopoeic words and sounds found in nature or everyday life. Focus on short, sharp syllable structures, often one to three syllables, emphasizing hard consonants and varied vowel sounds, like "Caw," "Chirp," or "Rustle." Kenku often incorporate clan names or titles that reflect their skills or roles, such as "Whisper" for a stealthy member or "Crash" for a more boisterous personality. As a concrete tip, consider the environment around your character; choose a sound that resonates with their background or experiences, making their name a reflection of their history.
