TAVERN CROWD

Top 100 Female Kobold Names

Kobold names often draw from a mix of Draconic influences and playful sounds, with roots in languages like Germanic or Slavic. Focus on short names, typically 1-2 syllables, featuring hard consonants like 'k', 'd', and 'p' combined with sharp, squeaky vowels. Culturally, kobolds might adopt clan names or epithets that reference their mining skills or trap-making prowess, such as "Kik Trapfoot" or "Dap Gemfinder." When creating your own name, consider starting with a hard consonant and ending with a light vowel to capture that scrappy essence, like "Pik" or "Ked."

1. Kivalk
2. Dripka
