TAVERN CROWD

Top 100 Male Orc Names

When creating Orc names, draw inspiration from harsh, guttural languages like those of the Mongolian or Inuit cultures. Focus on phonetic patterns that emphasize hard stops and growling consonants—think of sounds like "g," "k," "b," and combinations like "gr," "kr," and "dr." Names are often a single explosive syllable or two, sometimes paired with tribal or clan names, and may include fierce epithets like "-skull," "-tooth," or "-blood" to signify battle achievements. A solid tip is to combine a strong, short name with a fierce descriptor; for example, "Grom-grim" or "Krag-blood" to create an impactful identity.

1. Braknar
2. Gromkash
3. Throkgar
