TAVERN CROWD

Top 100 Male Warforged Names

For Warforged names, draw from a mix of mechanical and utilitarian roots, often inspired by languages like Latin or German for a more robust feel. Aim for two to three syllables, focusing on hard consonants and sharp vowels, such as "Krax" or "Zyra." Consider cultural elements like clan names or epithets that reflect their role or purpose, such as "Ironheart" or "Sentinel." As a concrete tip, think about combining abstract concepts with phonetics—like "Forge" plus a personal touch, resulting in "Forge-Kin" or "Steel-Guide."
